

As one who enjoys hiking, biking, and snowshoeing on municipal, quasi-municipal, and private land, I support S.B. 43, S.B. 90, and H.B. 5254. The entities that provide free recreational access to the public should be immune from liability. Those who use these properties need to be aware of the inherent risks and be responsible for their own actions. Immunity will insure the continued recreational use for existing properties and create an environment that can encourage others to make their lands available.
